Pediatric Psychology/Psychiatry Update: Social and Behavioral Determinants of Health
October 26, 2017
Henry Hood Center for Health Research
Danville, PA

Course Director
Paul Kettlewell, Ph.D.
Associate
Division of Psychiatry and Behavioral Medicine

Course Fees
Physicians: $85.00
Advanced Practitioners: $50.00
Residents and Medical Students: $35.00

Target Audience
This program is designed for Behavioral health practitioners including psychologists, social workers, psychiatrists and professional counselors; physicians; residents and medical students in psychiatry, pediatrics and psychology; nurses; social guidance counselors or other school personnel.

Objectives
At the completion of this course, the participant should be able to:
• describe the core concepts about how social factors such as experiencing childhood adverse events can contribute to negative health outcomes
• discuss at least one preventive model of health service delivery with empirical evidence which demonstrates improved health outcomes
• explain the importance of considering social factors in providing health care services
• apply steps to respond in helpful ways when social factors are identified
